2023 BIKES/ GRAVEL

BERRIA
BELADOR
ALL ROAD

Expand your Gravel borders.
Enjoy without limits on all terrains

Gravel type 1 - 2

Versatile on and off-road.
Agile and compact geometry.

Forest roads with gravel and mud.

Medium technical level.

Adventure, gravel competitions

Gravel type 3

All-road evocative.
Compact full suspension geometry.

Front suspension fork with 30mm travel amplifies its capabilities in the most technical terrain.

Hard and rocky terrain or extreme mud.

High technical level.

Extreme gravel routes..

A L L R O A D

Versatile on and off the road. Fast and Capable. It devours all kinds of roads. These are some of the features that make the Belador Allroad a vehicle for adventure or pleasure. Everyday of the year.

BERRIA
BELADOR
HYBRID

Sporty and light, smooth and powerful,
manageable and fast. The unstoppable evolution.

The new **Belador Hybrid** is the road e-bike called to be the benchmark in its category. The perfect integration of aerodynamics and performance.

With its racing geometry, you will forget that you pedal on an electric bike. Enjoy a new way of cycling, with autonomy, power, speed and great performance. Powered by Polini, a smooth and silent, yet powerful engine.

BERRIA
BELADOR

High performance road bikes

This subtle balance between opposing needs such as **maintaining a light structure, high aerodynamic efficiency and excellent dynamic behavior** has led us to design new sections of KAMM profiles that are more sophisticated and perfectly integrated between the frame, fork, wheels and the rest of the components.

EXCELLENT INTEGRATION

The Belador 5 platform is a tribute to aesthetics and component integration thanks to its **aerodynamic design and slick cable integration technology (ICS2)**.

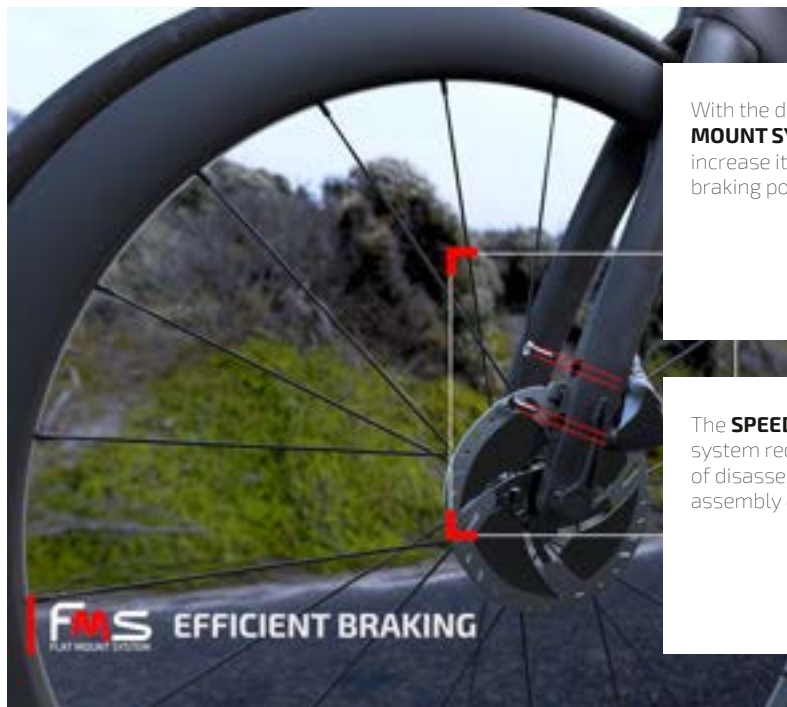

The perfect alchemy
between **form, efficiency,
function and aesthetics**

The secret of its aerodynamics lies in the **design of the sections in the frame-fork-peripherals** that manage to keep the laminar flows aligned, limiting the turbulence generated by the wheels in motion.

Lower air pressure minimizes vortices in the most critical aerodynamic zones of the bike.

With the direct **FLAT MOUNT SYSTEM** we increase its rigidity, and braking power.

The **SPEED RELEASE** system reduces the time of disassembly and assembly of the wheel.

The **technologies applied to the rear of the new Belador make it the perfect bike** for a wide spectrum of uses:

- The **TUBELESS 28mm section** tire allows you to ride with low pressure, filtering micro-interference from the terrain.
- The **carbon type used and the orientation** given to the fibers in the upper area of the frame provide excellent qualities for absorbing ground vibration, keeping the bike stable between the two axles.
- The seatpost with controlled flexibility improves comfort for the cyclist. The strongest road vibrations are neutralized thanks to its **ACTIVE STAY** system used in the seat stay area. The specific technologies applied in the front axle **increase braking power and SAFETY while reducing BRAKING distance**.
- Firm fork with **ASYMMETRY + 22% in the part of the brake caliper**.
- Frame with **RIGID STEERING FRONT** with oversized OH2S bearings.
- **TUBELESS tire to increase GRIP** on the asphalt both when cornering and when braking.

This set of solutions provides precise and **safe driving, increasing the stability and speed of the bike when cornering**.

2023 BIKES/ ROAD

BERRIA
BELADOR

The bike that suits the needs of the most demanding cyclists.

Aerodynamic and efficient. With its ultralight weight, it is reactive and effective.

Its BGC (Berria Geometry Concept) geometry is avant-garde for a dynamic, precise and stable behavior. The elegant integration of its components is a proof of efficiency and optimization.

2023 BIKES/ CROSS COUNTRY

BERRIA
BRAVO
HYBRID

Redefine your limits.
Versatile, powerful and functional.

It is equipped with Bafang's M500 motor, which delivers a maximum peak power of 95Nm at 500w.

The motor pack is integrated into the frame, giving the Bravo Hybrid HP a sober and elegant look.

Maximum autonomy in its category

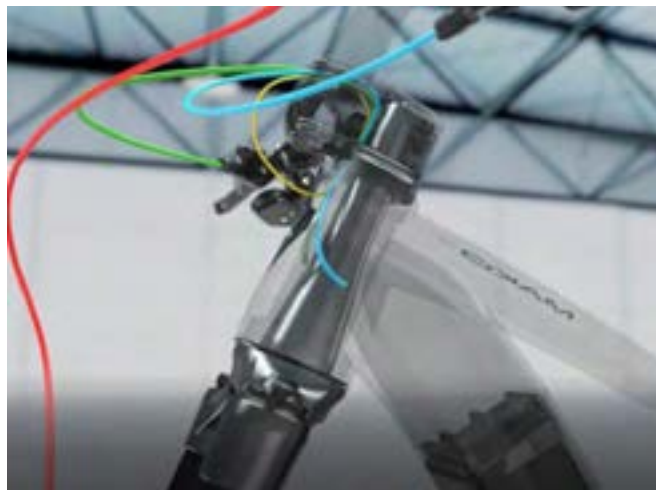

The main battery is a quick remove, contains top quality Samsung cells and has a capacity of 720Wh.

There is also the option to fit an extender, increasing the capacity to 972Wh.

The direction with **Block-lock** system prevents the handlebar from hitting the frame. Increased protection against possible falls is achieved.

Total integration of the wiring from the power to the speed sensor. This offers complete protection of the entire system.

Universal Derailleur Hanger is a universal derailleur hanger system available in all specialized stores.

Both the keyboard and the display are functional and simple.

The **Bafang Go App** application allows you to link the engine with the mobile phone.

The **Precision Casting Process** technology allows us to achieve a lightweight, yet strong structure in critical points of the frame. . The result is a modern and integrated design, that makes the new Bravo Hybrid HP one of the most efficient bikes in its segment.

Its modern geometry is equipped with a 35mm bar fork with 120mm of travel, and a relaxed 68 degree steering angle for smooth and safe riding. It has short 448mm chainstays and an advanced 74.5 to 76-degree saddle angle for high pedalling efficiency and reactive acceleration.

BERRIA
BRAVO

Reactivity has a name.

The concept of cable integration in the new Bravo has led us to extend ICS2 technology from the handlebar to the rear carriage, guaranteeing the best protection of the wiring and superior aesthetics.

INTEGRATED THROUGH AXLE

The new design of the rear dropouts complete the elegant integration concept of the new Bravo 5.

UDH Universal Derailleur Hanger.

Lightweight and resistant, designed to guarantee perfect chain alignment and avoid shifting towards the derailleur.

The new Bravo is the hardtail bike that can be defined as Berria's flagship. It has an outstanding set of components, features and super design.

Its new geometry enhances its already excellent behavior and performance; It is the right choice for users looking for a fun ride but also for those riders involved in serious racing. The new Bravo is more elegant thanks to its cable integration works and is also available for color customization. The sky is the limit.

BERRIA
MAKO
HYBRID

The hybrid bike that will conquer you.

The direction with **Block-lock system** prevents the handlebar from hitting the frame. Increased protection against possible falls is achieved.

The tapered headset (Tapered) is oversized to 1.5"-1.8" and provides **greater stiffness to the front end**; facilitates wiring integration and provides a more streamlined design line between the downtube and the battery.

MAKO HYBRID HFP

With ICS2 technology we achieve **total wiring integration**

The IICS interior wiring system, in addition to improving aesthetics, increases protection against the elements, thus ensuring optimal performance of the braking and gearbox system.

Universal Derailleur Hanger is a universal derailleur hanger system available in all specialized stores.

Lightweight and resistant, designed to ensure perfect chain alignment and avoid slipping into the derailleur.

HYBRID PERFORMANCE
ALLOY STRUCTURES FOR IMPROVED
PRECISION AND ENDURANCE

With the **Precision Casting Process Technology** system, we achieve greater lightness, precision and resistance in the main parts of the structure.

PRECISION
CASTING
PROCESS
TECHNOLOGY

MAKO HYBRID HP

The **unique design of the engine's** chasis allows the rear trolley anchor to be included in its interior, achieving a more compact structure that also minimizes the accumulation of mud in the area.

HYBRID PERFORMANCE

**DOWNTUBE BLOCK
PROTECTION**

Completely assembled with Full ball bearings in every joint to ensure greater load resistance and durability in tight turning jobs such as the Mako Hybrid HP suspension linkage.

**EXTRA TOUGH DOUBLE-ROW
FULL BALL BEARINGS**

- 1 **0% - 13% REGRESSIVE**
ADHERENCE IN BROKEN GROUND
- 2 **20 - 25% SAG POINT**
CONFIGURE ACCORDING TO THE WEIGHT OF THE RIDER
- 3 **20% - 80% CONSTANTLY PROGRESSIVE**
BALANCE BETWEEN SENSITIVITY AND PERFORMANCE
- 4 **80% al 100% PROGRESSIVE - LINEAR**
INCREASES HARDNESS
MAXIMUM ABSORPTION
QUICK RETURN OF SUSPENSION

Flip-Chip System

With the Flip chip system we are able to adapt the bike's suspension to the user's demands.

• Front axle with 35 / 150mm fork:

TOURING: we increase stability

SPORT: we increase driving agility

• On the rear axle:

TOURING: we improved COMFORT on long routes, suspension travel 143mm

SPORT: increase REACTIVITY and ACCELERATION, suspension travel 148mm

HYBRID
HP

The range of the Mako Hybrid is undoubtedly the best in its segment. The main battery has 720Wh and it is compatible with external batteries such as the 252Wh supplementary extender, thus achieving an incredible 972Wh.

250W Nominal Power
500W Peak Power
95Nm Maximum Force
3370gr

MAKO
HYBRID
HP

The **Bafang Go App** application allows you to link the engine with the mobile phone, thus accessing multiple information supplementary to that of the engine, such as real-time data on the athlete, navigation, and driving data.

Mako Hybrid GT with light carbon structure and with its geometry and kinematics expand the possibilities of use for a wide range of riders. With the most powerful engine on the market and an assembly of select components, we can consider the Mako Hybrid as a revolutionary E-bike that's been born to redefine its segment. The new **ultralight E-bike** concept.

Mako 150 Hybrid HP is the new light E-Bike concept with 29" wheel that combines a compact and stylish aesthetic with an agile and powerful driving.

Its aluminum structure combined with its geometry and kinematics place it at a higher level thanks to the experiences and possibilities of use for a **wide range of public**.

2023 BIKES/ CROSS COUNTRY

BERRIA
MAKO

The competition predator

Extreme lightness, the most explosive reactivity and the best control come together in a single bike. The result is a Mako that catapults you to a higher level.

Mako is simply the best full suspension bike ever made by Berria.
